

# Flexi Services

Partner for flexible purchasing in your IT environment

**ALEF Flexi Services** are operated in your environment. As part of the installment, you get the HW/SW installation including the required SLA. Thanks to the pay as you grow approach, you pay only for the services actually consumed. The complete HW/SW installation including customer data are on-premises.

The installation, operation, maintenance and support of HW/SW infrastructure is on us. **ALEF Flexi Services** can also include Professional Services – architectural services, security services and other consulting services. The services are not limited by the size of the infrastructure. The advantage is also that you have the HW/SW with you throughout the rental period, and you do not have to worry about anything. We ensure monitoring of the entire environment, capacity planning, including increasing the required capacity.

## ALEF Flexi Services

Flexibly respond to rapidly changing business requirements

Meet IT requirements for using the latest technological trends, and for comprehensive infrastructure care

Simplify the purchasing process significantly

Ensure the security of customer and company data, and enable compliance with regulations

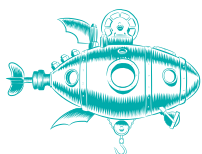

Make it easy to use the hybrid cloud model

Allow you to pay only for used capacity and services – pay as you grow

Flexible financing of infrastructure projects using **ALEF Flexi Services** combines the advantages of public clouds with the security of running IT in your own environment.
